AUDITOR'S REPORT

March 6, 1940.

To the Board of Selectmen and Citizens of the Town of
Glenburn, Maine.

Gentlemen:

We have completed the audit of your books for the fiscal year ended February 27, 1940 and hand you, herewith, our findings under the following captions:

Exhibit 1 Comparative Balance Sheets.

Exhibit 2 Reconciliation of Tax Collector's Account
with Treasurer.

Exhibit 3 Reconciliation of Cash and Bank Balances.

Exhibit 4 Schedule of Notes Payable.

Exhibit 5 Schedule of Accounts Payable.

Exhibit 6 Analysis of Net Town Deficit Account.

During our audit we found that many debit entries had been made on the Warrants, the same to pay for merchandise sold to the persons credited on said Warrants by your Treasurer.

This practice should cease together with the past method of depositing personal monies in the Bank Account of the Town and drawing personal checks therefrom.

Respectfully submitted,

Maine Audit Company, Inc.,

RALPH A. HAMILTON,
Treasurer.

AVERY W. COOK,
Secretary.

INSTRUCTION

The instructors now in the schools are the same as in the previous year. To retain the same teachers, when they have proven successful, is a very decided asset in proving educational privileges for the young people. These teachers were able to adjust the schools on a working basis immediately after the opening of the fall term.

A matter of considerable concern is the situation regarding the primary school. After the schools opened last year it became evident that one teacher could not do justice to these pupils and Mrs. Mildred C. Cookson was employed as assistant. This arrangement worked out very well last year, and, because of the continued large enrollment, has been carried on during the present year. It will be noted that there is an increase of seven pupils in the school over the registration last year. In making a check-up of the number in the entering class for the next school year it is probable there will be no reduction in the number of pupils in the school. The situation in this school resolves itself into the question as to whether or not the town wishes to continue the present method, or to establish another school by a division of the grades, and that raises the question of providing a place for another school. It should have your careful consideration.

TEXT-BOOKS AND SUPPLIES

The expenditure for these items has been rather large owing to the large number of pupils registered and the necessary changes made in the adjustment of the courses in the grades. Where there have been changes no books have been discarded but have been used in the arrangement of the work. It would appear that the principle requirement for the next year would be purchases for filling in the required texts. The expense for supplies remains practically the same from year to year, being averaged by the number of pupils.

EQUALIZATION FUND

The town has received the sum of \$559.00 as its apportionment of the equalization fund. This apportionment becomes a part of the general school fund and is available for general expense in the department.

Notice has been received that the town will receive the sum of \$972.00 as the probable allocation of this fund in December, 1940. This fund is apportioned to the town for the purpose of meeting so far as possible a minimum program in the schools, and should be used as a fund to improve the educational opportunities in the town. It should be borne in mind that in order for a town to share in this fund its appropriations for school purposes must produce a tax rate equal to or in excess of the average of tax rates for the state for school maintenance. These suggestions have been emphasized by Dr. Bertram E. Packard, Commissioner of Education, in his outline of the apportionment.

CONVEYANCE

The conveyance of the pupils is one of the most difficult problems with which the superintending school committee is faced. During the present school year eleven children are being conveyed to the West Glenburn school and fifty eight are being conveyed to the Center schools. The conveyance at the Center is about equally divided between the two conveyances. Before the opening of the fall term an enumeration was made of those attending school from the New Road so-called, and there are seventeen being conveyed from that part of the town.

Considering the financial condition of the department, it is felt that the present arrangement for conveyance is the only one that can be made by the town. If the conveyance drivers could be paid enough to warrant an investment in regular school busses and be assured of a contract for a term of years to guarantee the expense involved, this ques-

tion would be very largely adjusted. It is merely called to your attention for such consideration as you may wish to give it.

HEALTH

You are again urged to give attention to the reports from teachers regarding the health and health conditions of the pupils. It is often an evident fact that the health of a child seriously affects the work in school. Kindly give these matters your attention for the welfare of the young people.

A new arrangement has been put into effect by the state in the matter of the work of the district nurse. At the present time this town is being included in a district and has a nurse whose assigned duties include work in the schools. It is hoped this work will be cordially supported.

REPAIRS

The large item of expense in this department for the past year has been the expense for painting the West Glenburn school building on the outside. It was necessary to replace a considerable number of clapboards and to install a new door. This work has not only greatly improved the appearance of the building but will preserve the surface. Other repairs have been of a minor nature and only such as are required from time to time. A few desks had to be purchased for the primary room.

A suggestion is made that during the coming year the interior of the West Glenburn school building be painted so as to complete the work on this building. Banking boards are needed for both buildings at the Center. If it should be decided to make a division of the schools at the Center, it would be necessary to provide blackboards for any room made available. A matter for consideration by the town is the fact that after the close of the school year there will

probably be available a considerable amount of desirable school furniture at a saving in price. This opportunity may well have the consideration of the town.

SAFETY

We are in need of material for instruction in this subject so that it may be kept before the young people with the emphasis that it deserves.

The State Department of Education is placing considerable stress on the subject, not alone in its relation to the highway traffic problem, but as a subject for prevention of all kinds of accidents and the general care of the health. A general cooperation is strongly urged to make the welfare of all a subject of interest to all.

FINANCIAL REPORT

You are respectfully referred to the report of the Selectmen for the financial statement of this department.

RECOMMENDATIONS

(February 1, 1940 to February 1, 1941)

REQUIRED

High school tuition	\$1,500.00
Elementary schools	1,900.00
Textbooks	125.00
School supplies	100.00

SPECIAL

School building repairs	\$150.00
-------------------------	----------

These estimates are made after a careful consideration of the probable expense in the department. The amount of the equalization fund to be received is taken into consideration.

The expense for high school tuition will remain approximately the same as for this year. The cost of maintenance of the elementary schools will vary but little from this year. It will be slightly less if the town provides for the electric light expense from another department. The expense for text books will probably be rather less than for this year

as the pupils become better supplied. The cost of school supplies will be about the same, as that expense remains constant on a per pupil basis.

The estimate for repairs is based on caring for the over-draft, providing for banking boards at the Center, and further equipment.

CLOSING

A summary of the year indicates that the usual progress has been made in the schools, as the children go ahead from grade to grade.

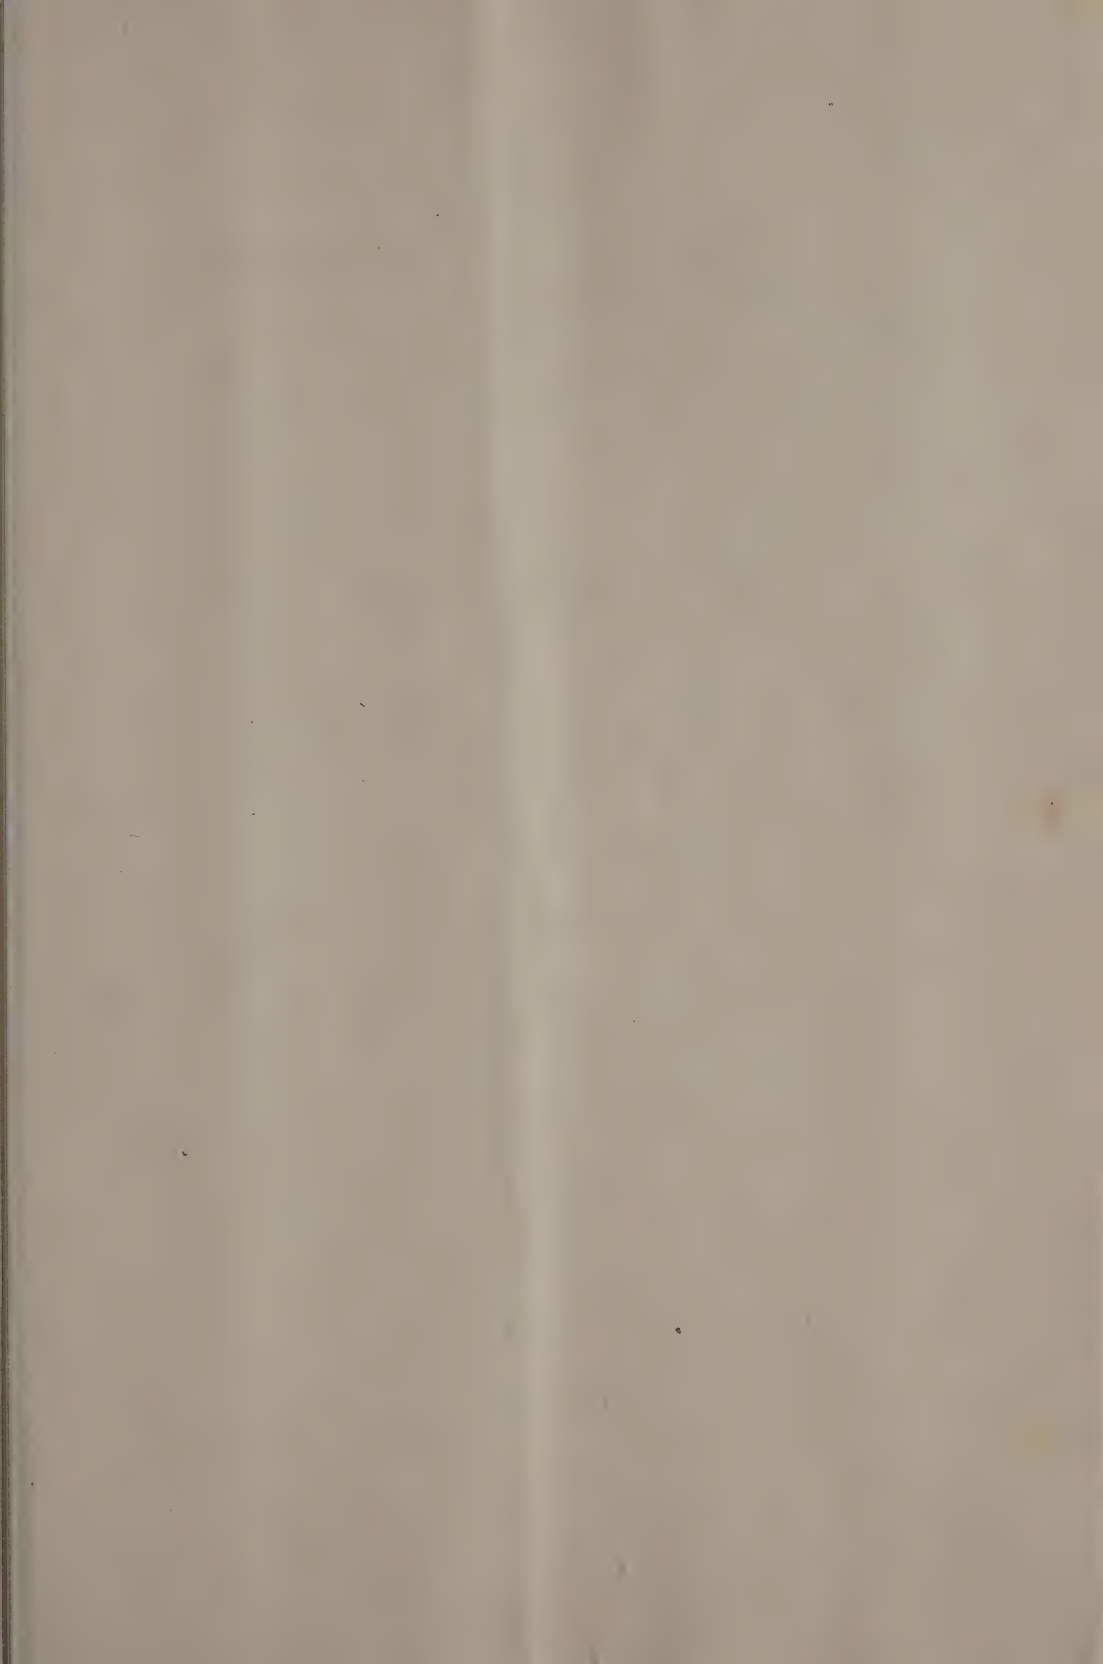

Surveys of school conditions are made from time to time and they serve to arouse us to the fact that there is need of still more progress with a richer curriculum to give the boys and girls as good a foundation as is possible upon which to build their future education whether it be in higher institutions of learning or out of school.

Their education is not finished with the termination of the term or with the school year, and the best help and guidance they can have is only to lead them to a better understanding of how to do still better work in their association with others in the everyday affairs of life.

Respectfully submitted,

H. D. RIDLON,

Superintendent of Schools.
